WORK EXPERIENCE

PLAID, INC

Technical Account Manager

June 2022 - Current

- Own outcomes for a \$20M+ fintech portfolio, serving as technical lead to keep API integrations robust and production-grade reliable across complex product stacks.
- Run integration audits and proactively surface optimizations; drive fixes and capture revenue (e.g., +\$30K MRR from previously unbilled API traffic).
- Engineer tailored solutions for high-throughput lending platforms, optimizing data quality, latency, and system resiliency through deep customer architecture analysis
- Lead QBRs and technical roadmap discussions with engineering, product, and executive stakeholders to align on growth and product strategy.
- Act as the voice of the customer within Plaid, turning field insights into actionable feedback for Product and Engineering.

Technical Support Engineer

May 2021 – June 2022

- SME for Income Verification during beta/early access—bridged Product, Eng, and Support to ensure a smooth GA launch.
- Partnered with high-touch clients to scope and prioritize strategic integrations; set up cross-functional workflows to streamline new product launches.
- Designed and delivered technical enablement content, including training videos and live sessions, accelerating ramp time for Customer Engineering and Support teams.

SWEET A LITTLE — SF based tech startup that built a real-time fulfillment network specialized in bubble tea and sweet treats. Ceased operations in 2020

Technical Operations Manager

September 2018 – March 2019

- Translated customer and ops needs into software features for website and internal systems (inventory, tracking, dispatch).
- Led SF SOMA central facility transition: layout, budget, permits, and cross-functional collaboration.

Senior Operations Manager

March 2018 – September 2018

- Scaled operational logistics by over 300% (fleet, personnel, inventory, storage) and managed operations team (12 FTE)
- Built an inventory tracking system from scratch using Typeform, Zapier and Google sheets, used for ordering, restocking and calibrating usage analytics

Operations Team Lead

August 2016 – March 2018

- Grew ops team from 1 to 10 employees by leading recruiting and training efforts
- Redesigned operational workflows, resulting in a 12% increase in efficiency and laying the groundwork for automation initiatives

EDUCATION

App Academy, San Francisco — Full-Stack Software Engineering

Fall 2019 - Spring 2020

Université de Montréal, Montréal — B.S. Communications and Politics

Fall 2011 - Spring 2016
